## ANCHOR GROUT SLOW / FAST

Grouting without the headaches – at strengths that last a lifetime. **Anchor Grout** is the permanent solution to support problems.

Every 25 kilograms of polypropylene bag of premixed dry grout is manufactured according to ACC specifications

A cementitious grout designed for full column loading of Roofbolts, Shepherd crooks and Rope Anchors, etc.

### Slow

Slow Anchor Grout obtains a 10 tonne pull strength after 24hrs, while Fast Anchor Grout achieves 10 tonnes after 2 Hrs.

### Fast

Fast Anchor Grout is used when permanent support is installed concurrent with development, at break-aways, and in highly stressed areas.

Anchor Grout is thixotropic and will not run out of vertical holes. Our stringent quality management ensures that there are no grouting headaches.

Grouting has never been as effective or as easy. Anchor Grout can be applied with any grout pump such as lategan, packwedger or hand pumps.

So when you want support that's effective, economical and easy – Anchor Grout, Slow or Fast, will never let you slip.

So when you want support that's effective, economical and easy – Anchor Grout, Slow or Fast, will never let you slip.

### Benefits

- Cuts cement usage drastically
- No cement burns or danger to eyes
- Enhanced rock and anchor bonding
- Easy to handle and store underground
- 30 minute pump life
